2.2.3 Institution facilitates building and sustenance of innate talent /aptitude of individual students (extramural activities/beyond the classroom activities such as student clubs, cultural societies, etc)

The foundation of each institution is its student body. The institute cultivates students' innate potential and aptitude in order to build and expand their skill sets across a range of subjects. The institute encourages students to participate in a variety of extracurricular activities and offers multiple opportunities for them to engage outside of the classroom in order to fully realize each student's potential.

Even though academics are the college's primary focus, students are encouraged to participate in a wide range of extracurricular activities and indoor and outdoor sports. Table tennis, badminton, basketball, volleyball, throwball, cricket, and gyms to improve strength training are among the many sports that the college offers.

Individual sports like as track and field, discus throw, tennikoit, and javelin throw have all been traditionally participated in by our students. There were state and national competitions for the collegiate squad.

With the support of the student core committee, the students organize annual events, develop their natural talents, gain self-assurance, and represent the college in intercollegiate competitions as well as at the zonal and state levels.

Their perspective on community welfare is shaped by an awareness of the local issues, which is gained through a number of awareness and screening camps held in association with IDA, government agencies, NGOs and other local bodies.

Their overall growth is ensured by their involvement in a variety of cultural events, such as essay competitions, elocution, art, dance, and music. The college hosts annual days,

sports days, and traditional days at the institution level, where a variety of activities are planned to foster interpersonal interactions.

Students diligently prepare for events related to special days, such as World No Tobacco Day, which aims to raise awareness and decrease deaths from tobacco-related health problems, International Yoga Day, which celebrates the physical, mental, and spiritual practice of yoga, Swachh Bharat, which promotes sanitation and improves solid waste management, and Environment Day, which invokes the spirit of having an eco-friendly atmosphere. Days of observance such as Doctor's Day, Women's Day, and National Dentist Day are observed to honor staff members who have made outstanding contributions.

Additionally, students actively participate in awareness-raising events such as Plantation Programs, World Hepatitis Day, World Water Day, National Youth Day, Anti-AIDS Day, Oral Hygiene Day and National Nutrition Day.

One of the main objectives of extracurricular activities on college campuses is the development of the well-rounded person. Students' intellectual, social, emotional, and interpersonal development can all benefit from these activities. Students develop their negotiation, communication, conflict-resolution, and leadership skills through group projects.
