Seminar on  
“MINI IMPLANTS”

Date: 04-09-2019

**KEYNOTE SPEAKER**

**Dr. lakshmana rao**

Professor and Head of the department  
Department of Prosthodontics

Venue: Lecture Hall - 2

Timings: 10am-1pm

DATE: 4.9.2019

REPORT

Name of the program : Mini Implants

Date/Duration : 4.9.2019, 10 am - 1 pm

Resource person : Dr Lakshmana Rao

Program objective : The main objective is to know the use of miniimplants to retain overdentures & also in orthodontics that enables the use of its complex surgical techniques.

Topics covered : -Anatomy & physiology,  
Indications & contraindications,  
Technique, complications & clinical significance

Program outcome : There is no doubt that the evolution of mini implants had a noticeable positive impact on dental treatment. They solved the long lasting anchorage problems.

Name of the coordinator : Dr Puvithavathy

No of participants : 30

## REPORT

Name of the program : CAD CAM

Date/Duration : 21-9-2019, 10 am-1pm

Resource person : Dr Lakshmana Rao

Program objective : The main objective is to know the use of CAD CAM in both dental laboratories & dental office and also its use in orthodontics in the form of invisalign retainers.

Topics covered : TRAD & stages of CAD CAM fabrication, computerized surface digitization / scanning selective laser sintering

Program outcome : To conclude CAD CAM technology has become a core part of dentistry with more number of restorations being fabricated, which better properties & esthetic demands of the patient.

Name of the coordinator : Dr Deepa

DATE: 19.10.2019

## REPORT

Name of the program : Intra Oral and Extra Oral Scanners.

Date/Duration : 19.10.2019, 10 am - 1 pm

Resource person : Dr. Sri Devi

Program objective : To identify the advantages / disadvantages of using optical impressions compared to conventional impressions. To investigate if optical impressions are as accurate as conventional impressions.

Topics covered : Differences between the Intra Oral & Extra Oral Scanners currently available commercially, clinical applications of both Intra Oral & Extra Oral Scanners.

Program outcome : The use of digital scanners is steadily increasing, enhanced user-familiarity & work-flow optimization may help clinicians choose the appropriate digital scanner mode after evaluating specific situations.

DATE: 31.10.2019

REPORT

Name of the program : Pterygoid Implants

Date/Duration : 31-10-2019, 10 am - 1 pm

Resource person : Dr Dal Singh

Program objective : The main objective is to know the importance of pterygoid implants insertion as an alternative to avoid sinus lifting or other grafting procedure to treat the posterior maxilla

Topics covered : Indications, implant placement, clinical recommendations, complications.

Program outcome : Restoring posterior maxilla using pterygoid implants is beneficial as these implants are stable biomechanically & there is no continuing of pontics.

Name of the coordinator : Dr Lakshmana Rao

DATE: 15.11.2019

REPORT

Name of the program : Extended Applications of laser in dentistry

Date/Duration : 15.11.2019, 10 am - 1pm

Resource person : Dr Murali Krishna

Program objective : The main objective is to elaborate the extensive applications of laser in different areas in dentistry

Topics covered : Types of laser, Soft tissue-Application: post herpetic neuralgia and aphthous ulcer, Aesthetic gingival re-contouring and crown lengthening, photodynamic therapy for malignancies, frenectomies, removal of inflamed, miscellaneous tissue removal

Program outcome : Laser technology for hard tissue application and soft tissue surgery is at a high state of refinement, having several decades of development, upto present time

## REPORT

Name of the program : Micro endo practice

Date/Duration : 21.12.2019 , 10 am - 1 pm

Resource person : Dr Murali Krishna

Program objective : For effective diagnosis of a condition and to also perform non surgical endodontic procedures. To detect tiny fractures, hidden canals, unusually positioned canals.

Topics covered : Use of a dental operative microscope to endodontic therapy for better visualization and management of intricate morphology of root canal system through magnification.

Program outcome : Surgical operating microscopes have a steep learning curve and mastering them requires training as well as practice with patience.

Name of the coordinator : Dr Punithavathy

No of participants : 30

## REPORT

- Name of the program : Rehabilitation of maxilla and orbit using  
3D printing with titanium
- Date/Duration : 25.1.2020, 10am - 1pm
- Resource person : Dr Lakshmana Rao
- Program objective : To evaluate the post operative tolerance of  
titanium in the patients who have  
undergone the surgery.
- Topics covered : Titanium tolerance is the primary end point  
evaluated for 6 months after procedure. The  
secondary endpoints will be the functional  
and esthetic characteristics of reconstruction.
- Program outcome : Post operative complications in the patients  
operated were observed to be very few and  
with satisfactory functional and esthetic results
- Name of the coordinator : Dr Dal Singh
- No of participants : 30
